Is the MTU Value of S9500 Modifiable

孟维佳 2007-02-27 发表

The MTU value is predefined for S9500 and unmodifiable.

The maximum MTU allowed by hardware forwarding is 10240. Inbound packets will be forwarded by S9500 if the MTU is less than 10240. Outbound packet will be fragmented if length of the packet is greater than 1500.
