

Veritas NetBackup Client 6.0 for Unix的安装配置

一、组网需求：

无

二、组网图：

三、配置步骤：

此处以HP-UX为例，在其它Unix系统（AIX、Solaris）上的安装过程完全相同，软件可以自动识别当前操作系统并安装对应的客户端软件，只需在“Enter the name of the NetBackup server”中输入备份服务器的主机名即可。以下是整个安装流程：

```
# ./install
```

VERITAS Installation Script

Copyright 1993 - 2005 VERITAS Software Corporation, All Rights Reserved.

Installing NetBackup Client Software

NOTE: To install NetBackup Server software, insert the appropriate
NetBackup Server cdrom.

Do you wish to continue? [y,n] (y)

Do you want to install the NetBackup client software for this client? [y,n] (y)

This package will install HP-UX-IA64/HP-UX11.23 client.

This package will install NetBackup client 6.0.

Enter the name of the NetBackup server : **backup-server**

Would you like to use "HP-UX-CLIENT" as the configured
name of the NetBackup client? [y,n] (y)

安装完成后编辑/etc/hosts文件，加入备份服务器的IP地址和主机名。如：

192.168.0.1 backup-server

四、配置关键点：

软件安装完成后要在/etc/hosts中加入备份服务器的IP地址和主机名。
