

Numbering Rules of the S9500 Software Releases

孟维佳 2007-06-30 发表

The release numbering rule for S9500 V100R001 is S9500-CMW3.10-11XX, or 11XX, of which the first 1 is V100 and the second 1 is R001, XX is the serial number. The only exception is the first version released by V100R001B01 S9500-CMW3.10-0008 (the last 4 numbers is the serial number) because the numbering rule was not specified then.

The release numbering rule for S9500 V100R002 is S9500-CMW310-R12XX, or 12XX, of which the first 1 is V100 and the second 2 is R002, XX is the serial number. The version before 1250 is R002B01, and the version after 1250 is R002B02.

The release numbering rule for S9500 V100R006 is S9500-CMW310-R16XX, or 16XX, of which the first 1 is V100 and the second 6 is R006, XX is the serial number. At present, only R006B01 is available.

Note that the serial No. XX do not have to be consecutive, because some versions are not released.
