Testing memoryOK!
128M bytes SDRAM
Hardware Version is MTR 1.0
CPLD Version is CPLD 1.0
Press Ctrl-B to enter Boot Menu
Press Ctrl+B to enter the BOOTROM menu.
Step 2: The following information is displayed after you press Ctrl+B : Please input Bootrom password:
Here, you need to enter the BootROM password (no password by default, press Ente r). If you have changed the password, you need to enter the correct one. The system aborts after three wrong inputs.
Step 3: The following information is displayed when you enter a correct BootROM pa
Boot Menu:
1: Download application program with XMODEM
2: Download application program with NET
3: Set application file type
4: Display applications in Flash
6: Start up and ignore configuration
7: Enter debugging environment
8: Boot Rom Operation Menu
9: Do not check the version of the software
a: Exit and reboot
Enter your choice(1-a): 2
In above prompt information, Select 2: Download application program with NET .
Step 4: Set the network parameters used by the FTP.
Net Port Download Menu:
1: Change Net Parameter
2: Download From Net
3: Exit to Main Menu Enter your choice(1-3): 1

Change Boot Parameter:

'.' = clear field; '-' = go to previous field; ^D = quit : fei0 boot device processor number : 0 host name : 8040 file name : vxworks AR28-VRP340-R0006-907-128-a.bin //Version file name to be downloaded/ inet on ethernet (e) : 169.254.64.108 1.1.1.1 //Interface address of the local router/ inet on backplane (b): host inet (h) : 169.254.64.1071.1.1.2 //FTP server address/ gateway inet (g) : user (u) : 8040 aaa //FTP account name/ ftp password (pw) (blank = use rsh): 8040 aaa //FTP account password //Do not modify the flag in FTP mode/ flags (f) : 0x0 target name (tn) : 340-0006.bin //Save the file name used in FLASH/ startup script (s) : other (o)

Modify parameters in red and use the default values for others.

Step 5: Enable the ftp software and set the directory where the version file is located and the account password.

Step 6: Select 2: Download From Net to download the version. Net Port Download Menu:

- 1: Change Net Parameter
- 2: Download From Net
- 3: Exit to Main Menu
- Enter your choice(1-3): 2

: fei boot device unit number : 0 processor number : 0 host name : 8040 file name : AR28-VRP340-R0006-907-128-a.bin inet on ethernet (e) : 1.1.1.1 host inet (h) :1.1.1.2 : aaa user (u) ftp password (pw) : aaa flags (f) : 0x0 target name (tn) : 340-0006.bin Attached TCP/IP interface to fei0.

Attaching network interface lo0... done

Loading... NET download completed... read len = [08695261]

Step 7: Upon the load, save the version file. You are prompted to save the version as some type of startup file.

Select 1. Main application file.

Save the version file as Main type. The system begins to save the file.

Please select file to be saved as

- 1. Main application file
- 2. Backup application file
- 3. Secure application file
- 4. Cancel downloading
- Enter your choice(1-4): 1

The file to be written is flash:/340-0006.bin, please wait.

Creating the file: flash:/340-0006.bin

Write data to flash...

Please wait, it may take a long time!

Write COMWARE software file operation success. Press <Enter> key to reboot the system .
