vms是怎样开机自动启动的

从安装文件可以看出，vms放在/etc/rc.d中自动启动

```
#copy the script for vms start/stop/restart
cp -f ./vms /etc/init.d/
cp -f ./rc.local /etc/rc.d/
```

rc.local的内容如下:

```
[root@iVS-VM8000-Server vm-release]# more rc.local
```

```
#!/bin/sh
```

```
#
```

```
# This script will be executed *after* all the other init scripts.
```

```
# You can put your own initialization stuff in here if you don't
```

```
# want to do the full Sys V style init stuff.
```

```
touch /var/lock/subsys/local
```

```
#start VM
```

```
/etc/init.d/vms start
```

```
[root@iVS-VM8000-Server vm-release]#
```
