-、 组网	如何在DL1000上挂载虚拟磁带库 需求:
Ŧ	Ē
二、组网	图:
Ŧ	Ē
三、配置	步骤:
1 2 1 1 0 3	、创建target, 石键点击创建的ISCSI Client-> Create Target出现如下对话框 Create #SCSI Target Tweet #ceit # Com haze DL1000-2h2e96-8 Tweet #ceit #ceit for Target Name: a to 2,0 to 9 and -: If Address: Valid characters for Target Name: a to 2,0 to 9 and -: If Address: Valid characters for Target Name: a to 2,0 to 9 and -: If Address: Valid characters for Target Name: a to 2,0 to 9 and -: If Address: Valid characters for Target Name: a to 2,0 to 9 and -: If Address: Valid characters for Target Name: a to 2,0 to 9 and -: If Address: Valid characters for Target Name: a to 2,0 to 9 and -: If Address: Valid characters for Target Name: a to 2,0 to 9 and -: If Address: Valid characters for Target Name: a to 2,0 to 9 and -: If Address: Valid characters for Target Name: a to 2,0 to 9 and -: If Address: Maxee: a to 2,0 to 10,0 to 15,0 to 10,0 to 10,
	是他一番他
4	、点击<是>出现如下对话框
	Assign iSCSI Resource to Target
	Select virtual drives for LUNs in the target  Select virtual drives for LUNs in the target  Citic the bath Resource to be assigned to the SAN Client.  Target Name: iscsi-target  Citic the bath of the detail column (+) to view the device grouping information for the tape library with tape drives.  Allow tape drive(s) in the tape library to be assigned individually.  Name Type ADIC-Scalar 100-00017 Virtual Library STK-L20-00029 Virtual Library
	Select All De-Select All

5、选择绿色的STK-L20-00029资源,点击<Next>,出现如下对话框,为资源分配LUN(逻辑单元号),通过右侧的上下箭头可以设置不同的LUN,一般选择默认即可。 点击<Next>。

Target Name: iscsi-tar	get	
Starting LUN: 0	Type	LUN
STK-L20-00029	Virtual Library	1 0

6、设置完LUN号后点击<Next>,出现确认对话框,点击<Finish>按钮,出现如下对话框

Neocean NeoVIL Console	
The iSCSI virtual devices has been successfully a	assigned.
确定	
7、点击<确定>按钮,设置成功。在SAN Client下可以查看相应的	设置

## 四、 配置关键点:
