

如何在WAAM上抓取日志log文件

进入WAAM的linux shell，运行“show tech-support”和“show tech-support-internal”命令。

例如将日志文件保存在log-acc-client文件中：

```
ACC#
```

```
ACC# xxh show tech-support > /user_area/log-acc-client
```

```
ACC# xxh show tech-support-internal > /user_area/internal-log-acc-client
```

```
ACC# cd /user_area/
```

```
ACC# ls
```

```
dump-acc-client      internal-log-acc-client log-acc-client
```

```
ACC#
```
