

知 端口下“loopback-detection shutdown enable”与“loopback-detection control enable”命令互斥的说明

岳斌 2008-06-23 发表

端口下这两条命令只能同时配置上一条，后配置的命令将取代之前配置的那条命令。如下所示。

```
[S3600-EI-Ethernet1/0/2]dis th
#
interface Ethernet1/0/2
port link-type trunk
port trunk permit vlan all
loopback-detection control enable
loopback-detection enable
#
return
[S3600-EI-Ethernet1/0/2]loopback-detection shutdown enable
[S3600-EI-Ethernet1/0/2]dis th
#
interface Ethernet1/0/2
port link-type trunk
port trunk permit vlan all
loopback-detection enable
loopback-detection shutdown enable
#
return
```
