

secpaht防火墙未知情况下重启, 问题定位收集信息命令:

一、<H3C>dis diagnostic-information

二、进入隐藏模式下:

```
[H3C-hidecmd]en_diagnose
```

```
input password (1-12 characters) :diagnose
```

```
This mode is for our engineers to test. Running these commands could result in exceptions. Please do not run these commands without owner's direction.
```

```
[H3C-diagnose]trapdebug ?
```

```
calltrace calltrace
```

```
dump dump
```

```
reg reg
```

```
stack stack
```

```
tst tst
```

```
[H3C-diagnose]trapdebug calltrace
```

```
[H3C-diagnose]trapdebug dump
```

```
[H3C-diagnose]trapdebug reg
```

```
[H3C-diagnose]trapdebug stack
```

收集打印堆栈信息
