

### The Match Order of Command Match-template In MSR Series

**Keywords:** MSR;Match Order;Match-template

**Q: How about the match sequence of match-template about template T, when there are many different templates?**

A:

Suppose there are policy below:

```
#  
entity 100 voip  
match-template T  
#  
entity 200 voip  
match-template 0755123456  
#  
entity 300 voip  
match-template 0756.....
```

We can see there are three templates, when the default match order is Shortest First, and template T will be match last.
