The MSCA In MSR Series

Keywords: MSR;MSCA

Q: Does MSCA must be used in MSR Series ?

A:

The MSCA that located in the back of MSR is Mult-Service Card A, It can support VCPM,VPM,ESM etc. It not a necessary module in MSR, only when customer has related application.

Related Concept:

MPUF is the mainboard of MSR, a complete host system. MSCA is a back mainboard of MSR, it provide extend slot to VPM, VCPM, ESM0 and ESM1. Normally, MSR running with MPUF only. If there has extend requirement of the modules that meantioned before, MSCA must be configured. The slot that MSCA provide now:

Item	Number
VPM slot number	4
VCPM slot number	1
ESM slot number	2
