

**The relationship of Voice Entity and Logical Interface In MSR Series**

**Keywords:** MSR;Voice Entity;Logical Interface

**Q: Whether the relationship between voice entity and logical interface is from high to low(eg. 15 to 1), or can be defined by people?**

A:

The default is from low to high. For example, if there is 30 B-channel, first will choice 0 channel, and then 1 channel. Also, this can be defined by manual: *isdn bch-select-way*
