Under E1 interface how to configure ISDN PRI interface's match between POTS voice entity and logical interface?

Q：Under E1 interface how to configure ISDN PRI interface's match between POTS voice entity and logical interface?

A：
Example: (phone number 010-1001)
 [Sysname-voice-dial-entity1001] match-template 0101001
[Sysname-voice-dial-entity1001] line 1/1:15
