Secpath firewall自动重启堆栈收集信息

张岚　2009-02-20 发表

V3平台
在诊断模式下获取calltrace和reg信息：
[SecPath100F_SUB-hidecmd]en -------〉隐含模式下键入en
 input password (1-12 characters)： -------〉密码huawei-3com
 This mode is for huawei engineers to test. Running these commands could result
in exceptions. Please do not run these commands without directions of huawei eng
ineers.
[SecPath100F_SUB-diagnose]trapdebug calltrace　　\
　　　　　　　　　　　　　　　　|-----> 分别获取calltrace和reg信息反馈
[SecPath100F_SUB-diagnose]trapdebug reg　　　/
注意：不要使用[SecPath100F_SUB-diagnose]trapdebug test，否则设备立即重启。

V5平台
[H3C]_hidecmd
Now you enter a hidden command view for developer's testing, some commands may
affect operation by wrong use, please carefully use it with our engineer's
direction.
[H3C-hidecmd]display exception 10 ver
查看保存的10次堆栈信息。
