如何在iMC中自定义告警级别

iMC数据库中定义了各种告警，用户可以根据需求自定义告警级别。方法非常简单，进入【Trap定义一览表】，勾选需要修改告警级别的告警名称，然后【修改Trap级别】即可。

The screenshot displays the iMC Trap Management interface. On the left is a navigation menu with options like 'Trap管理', 'Trap定义一览表', and 'Syslog管理'. The main area is titled 'Trap定义一览表' and contains a search form with fields for 'Trap名称', 'Trap OID', '企业名称', and '企业ID'. Below the search form is a table of trap definitions. The table has columns for 'Trap名称', 'Trap OID', '企业名称(企业ID)', 'Trap级别', and 'Trap类型'. Three rows are visible, each with a checkbox in the first column. The 'Trap级别' column shows '重要' (Important) for the first two rows and '紧急' (Urgent) for the third. A red box highlights the '修改Trap级别' button located above the table. The table data is as follows:

Trap名称	Trap OID	企业名称(企业ID)	Trap级别	Trap类型	操作
<input type="checkbox"/> 15分钟网络告警	1.3.6.1.4.1.2011.2.23.11.2.6.2001	S8016 (1.3.6.1.4.1.2011.2.23.11.2)	重要	预定义	
<input type="checkbox"/> 24小时网络告警	1.3.6.1.4.1.2011.2.23.11.2.6.2002	S8016 (1.3.6.1.4.1.2011.2.23.11.2)	重要	预定义	
<input type="checkbox"/> -48小时输入告警	1.3.6.1.4.1.2011.2.17.6.50	Huawei NE80 Traps (1.3.6.1.4.1.2011.2.17)	紧急	预定义
