问题描述

源客户端按照失败，有如下报错

```
uninstall driver! [ OK ]
CDP Module install Success!

nowly start to install DATASURE service...

Generating DataSure.img. This step may take a few minutes, please wait...
No module libata found for kernel 2.6.39-300.26.1.el5uek, aborting.
fatal error occurs while generating initrd-2.6.39-300.26.1.el5uek.DataSure.img
please check or contact us! [ FAILED ]

Now check client agent process and cdp driver...
-----
cdp 25104 0
-----
```

```
[root@localhost CDAP-6.0.0-1]# sh install.sh

nowly start to install DATASURE service...

Generating DataSure.img. This step may take a few minutes, please wait...
No module scsi_mod found for kernel 2.6.39-300.26.1.el5uek, aborting.
fatal error occurs while generating initrd-2.6.39-300.26.1.el5uek.DataSure.img
please check or contact us! [ FAILED ]

[root@localhost CDAP-6.0.0-1]# sh uninstall.sh

nowly start to uninstall DATASURE

archive log: [ OK ]
restore grub: [ OK ]
uninstall DATASURE: [ OK ]
uninstall DATASURE succeeded!
```

过程分析

这是由于缺少libata和scsi组件导致

解决方法

通过以下命令 将这两个组件拷贝到客户端目录下，重新执行sh install.sh解决

```
cp /lib/modules/2.6.18-348.el5/kernel/drivers/ata/libata.ko /lib/modules/2.6.39-300.26.1.el5uek/kernel/drivers/ata/
```

```
cp /lib/modules/2.6.18-348.el5/kernel/drivers/scsi/scsi_mod.ko /lib/modules/2.6.39-300.26.1.el5uek/kernel/drivers/scsi/
```

```
[root@localhost CDAP-6.0.0-1]# sh install.sh

nowly start to install DATASURE service...

Generating DataSure.img. This step may take a few minutes, please wait... [ OK ]

adding etf boot entry:Find some etf file!
adding boot entry:cp /usr/sbin/lilo /usr/sbin/grub/grub-install
This is a grub config file.
vmlinuz[title Database Boot Entry (2.6.39-300.26.1.el5uek)lilo, "\troot (hd0,0)lilo, "\tkernel /boot/vmlinuz-2.6.39-300.26.1.el5uek ko root=LABEL#/ sbl
grub quietlilo, "\tinitrd /boot/initrd-2.6.39-300.26.1.el5uek.DataSure.imglilo"]
add boot entry to /boot/grub/grub.conf successfully!
grub.cfg does not exist. [ OK ]

install shod
This is not a database vm.
scripts will not proceed.
