问题描述

为什么S75E设备super密码多次输入错误导致被锁定?

解决方法

V5设备新版本特性：super密码连续5次输入错误，会导致super密码被锁定！

如下测试是在S7506E上做的测试：

```
<H3C>super 3
Please input the password to change the privilege level, press CTRL_C to abort.
Password:
Please input the password to change the privilege level, press CTRL_C to abort.
Password:
Please input the password to change the privilege level, press CTRL_C to abort.
Password:
Please input the password to change the privilege level, press CTRL_C to abort.
Password:
Please input the password to change the privilege level, press CTRL_C to abort.
Password:
Please input the password to change the privilege level, press CTRL_C to abort.
Password:
<H3C>super 3
Error: Local Authentication is locked, please try it later.
<H3C>super 3
Error: Local Authentication is locked, please try it later.
<H3C>super 3
Error: Local Authentication is locked, please try it later.
<H3C>
```

此种情况，需要等15分钟后解锁（用户不要登录设备的情况下，仅仅在用户视图也不可）

功能目前无法关闭，默认开启。
