

## 知 cr16、sr88 spc板下发策略路由提示不支持

策略路由 程咪 2019-11-27 发表

### 问题描述

cr16、sr88 spc板下发策略路由提示不支持

### 解决方法

#### cr16、sr88 spc板下发策略路由提示不支持

```
[QiChun_WangLuo_H3C_CR16010_F-Route-Aggregation2]ip policy-based-route qc
The operation is not supported on slot 3.
The operation is not supported on slot 0.
The operation is not supported on slot 1.
[QiChun_WangLuo_H3C_CR16010_F-Route-Aggregation2]display this
#
interface Route-Aggregation2
description TO-H3C-SR8808_F
ip address 172.31.255.19 255.255.255.248
```

单板类型为:

```
[QiChun_WangLuo_H3C_CR16010_F]display device
Slot No. Brd Type      Brd Status  Software Version
0   CSPC-XP8LB   Normal     CR16000-CMW710-R7353P13
1   CSPC-XP8LB   Normal     CR16000-CMW710-R7353P13
2   NONE        Absent     NONE
3   CSPC-GP24XP2LB Normal     CR16000-CMW710-R7353P13
```

在SCP板聚合口下是不支持下发PBR的。

目前MQC/PBR/Packet Filter配置只有物理接口和vlan口支持配置，**聚合口**或者其它类型的全局口都不支持配置，需要到对应的物理成员口或者vlan口上去配置
