cloudos 9090页面备份卡住

zhiliao_6bAvN 2019-12-05 发表

Cloudos 2.0

在cloudos9090页面进行系统备份，但一直卡在0%，清空浏览器缓存重新登录还是一样，重启deploy-manage服务也不行。

查看/opt/matrix/logs/cloudosbackup的日志会有如下报错，怀疑可能是备份时服务有异常：

```
nodeName:
No minions matched the target. No command was sent, no jid was assigned.
minionid:received
path:
nodeName:
No minions matched the target. No command was sent, no jid was assigned.
minionid:extra
path:
nodeName:
No minions matched the target. No command was sent, no jid was assigned.
minionid:data.
path:
nodeName:
No minions matched the target. No command was sent, no jid was assigned.
@@@@@@@@@@@@@@@@@@ backup cluster etcd data failed @@@@@@@@@@@@@@@@@@@@
```

查看备份的配置文件为：

```
[root@cloudos1 logs]# cat /opt/matrix/backup/conf/backup-result.json
{
"serviceName" : "postgre",
"status" : "running",
"errorCode" : "{ERROR_CODE}"
}
```

修改配置文件，初始化参数vi /opt/matrix/backup/conf/backup-result.json：

```
{
"serviceName" : "{SERVICE_NAME}",
"status" : "{STATUS}",
"errorCode" : "{ERROR_CODE}"
}
~
~
~
```

重启服务：

systemctl restart deploy-manager.service

再进入matrix9090页面则可以恢复正常状态。
